

Course Description

Novell ZENworks 10.3 Configuration Management Administration (Course 3108 v1)

Course Overview

Looking to manage your software and desktops?

The Novell ZENworks 10.3 Configuration Management Administration course teaches students the fundamental concepts, processes, and architecture of Novell ZENworks 10 Configuration Management using Novell ZENworks 10 Configuration Management and be able to perform basic administrative tasks. Students will then build their administrative knowledge and skills by performing more involved administrative tasks (such as migrating ZENworks 7 Desktop Management or implementing patch management) for products that are integrated into ZCM 10 SP3.

Training Level:

- 2 - Intermediate

Duration :

- 5 Days

Delivery Method:

- Virtual Classroom

Key Objectives

- Describe Novell ZENworks 10 Configuration Management
- Install Novell ZENworks 10 Configuration Management
- Migrate a Traditional ZENworks Environment to ZENworks 10 Configuration Management
- Register Devices for ZENworks Configuration Management
- Manage ZENworks Bundling
- Configure ZENworks Configuration Management Policies
- Configure Remote Management

- Image Computers with ZENworks Configuration Management
- Manage Inventory and Data Collection
- Run ZENworks Configuration Management Reports

Audience

This course is designed for:

- Novell software system administrators, integrators, and engineers
- Networking consultants
- Reseller/partner technical support staff
- New Novell ZENworks 10 Configuration Management customers

Established Novell software administrators with no ZENworks 10 experience can take this course if they are already familiar with using eDirectory (and related tools such as iManager) and have some experience administering products such as ZENworks Desktop Management. New Novell customers tasked with evaluating or administering Novell ZENworks 10 Configuration Management can also attend this course but should have a basic familiarity with Novell eDirectory, Microsoft Active Directory, and Windows Server.

Prerequisites

Before taking this course, you should have a basic understanding of networks and networking (as introduced in the CompTIA Network+ certification). In addition, you should be familiar with the fundamentals of an LDAP-compliant Directory service (such as Novell eDirectory or Microsoft Active Directory). Some experience with fundamental Linux administration will also be helpful.

Course Test Information

This course along with the skills taught in Novell ZENworks 10 Configuration Management Advanced Administration (Course 8004) prepares you to take the Certified Novell ZENworks Administrator Certification Exam (050-725).

Course Outline

SECTION 1 - Describe Novell ZENworks 10 Configuration Management

- Plan Your Implementation, Review Requirements, and Perform Standard and Unattended Installation
- Access ZENworks 10 Configuration Management Tools and Configure User Sources

SECTION 2 - Install Novell ZENworks 10 Configuration Management

- Plan and Perform a Standard and Unattended Installation

SECTION 3 - Migrate a Traditional ZENworks Environment to ZENworks 10 Configuration Management

- Migrate Data from ZENworks Desktop Management to ZENworks 10 Configuration Management Using Best Practices

SECTION 4 - Discover, Register, and Deploy Devices for ZENworks Configuration Management

- Configure Registration Keys and Rules

SECTION 5 - Manage ZENworks Bundling

- Distribute, Create and Manage Bundles and Configure Action Sets and Actions
- Describe and Use ZENworks Software Packaging - AdminStudio

SECTION 6 - Configure ZENworks Configuration Management Policies

- Describe and Create ZENworks Configuration Management Policies
- Manage Policies, Policy Groups, and Folders

SECTION 7 - Configure Remote Management

- Describe and Set Up ZENworks Remote Management and Manage Remote Sessions
- Describe ZENworks Remote Management Security Issues

SECTION 8 - Image Computers with ZENworks Configuration Management

- Describe and Set Up Preboot Services and Imaging
- Configure Image Safe Data and Configure and Use Imaging

SECTION 9 - Manage Inventory and Data Collection

- Scan Managed Devices, Inventory-Only Devices, and Demographic Data
- Manage Component Data and Product Data

SECTION 10 - Run ZENworks Configuration Management Reports
